

Unifor Local 25

The bargaining committee has advised the local that an agreement was reached to return the 76 workers which were unjustly declared surplus back to the job. These workers are going to be contacted by the company directly and advised of their status.

Part of the agreement to ensure the workers are brought back will be the allowance for a limited package to be made available. This will not be a general offer of an RIO/VSP as had been desired but it will not be the narrow selection the company had demanded.

There was compromise on both sides.

The unity shown throughout the bargaining unit brought the company back to the table and without the solidarity shown across two provinces, we would still have 76 people left without employment and their futures in jeopardy.

Specifics will be made available by the company and the bargaining committee in due course and the local shall share the details once we are given them.
